Abroad with pride we are proud to have participated in projects of international importance with yards to the Sphinx in Cairo, the museum Ernest Hemingway, in San Francisco de Pula in Cuba, the Templo Mayor in Mexico City.

We have worked for the consolidation of the city's temples of Angkor in Cambodia and on many other sites not considerable importance, protected by UNESCO and listed in the UNESCO world culture.

For some interventions Tecres now joins the Consortium Kavaklik Restoration working with us for several years in the field of restoration and maintenance of monumental works in order to ensure the best possible interventions.

Just to give some examples

The fairs of the sector

We participated in the biggest fairs in the construction sector and restoration

- France - Batmen de Paris
- Germany - Bauman in Monaco
- Germany - Restoration in Leipzig
- Spain - The fair construction
- Croatia – Belgrade
- Romania – Bucharest
- Twills of Bologna in Italy, Restaura of Genoa, Levante in Bari, Restoration of Catania, other Turin, Rome, Pescara, Naples etc. and finally, but not least, **that of the restoration of Ferrara the first ever event of restoration and consolidations at the international level.**

Our strategy

In Italy, the Group has consolidated and become known for the many restoration , consolidation and drying performed on most of the monuments of national importance last " The Colosseum " .

We cooperate with leading design firms in the national and international not only for the realization of works and actions, but we are also active in research of new techniques , placing us at the forefront in the specific area , working with technologies that are less invasive and machinery with high technological content.

The Tecres ltd will soon open a new office in Ravenna in the municipality of Fusignano to cooperate with the authorities to interventions of static consolidation, using its experience and technology in the field, thus being able to have a more effective logistics in areas already affected by the earthquake in Emilia Romagna and the Marches and interested even in these days of telluric phenomena.

The company, among other things, participates from different time to the recovery and separation of waste resulting from processing by the interventions, with selection of the material, through its reuse with grinding mills crushers .

Provides for the separation is for strength , disposing of the same through its own subsidiary, the consortium Cosmari, which provides for the recovery and reuse of all materials not used in the building, such as plastics, cartons, hardware etc. .

Our company has consolidated over time the processes of self- direction in order to increase its marketing capabilities to respond in a timely manner at the time of construction and delivery. It has increased its fleet of equipment, being able to use also their own workshops for the repair of vehicles and equipment maintenance. Uses its own carpentry workshop, workshop for machining steel and painting operations. All this for a short time and high quality in carpentry works.

The way we work as a team

The company Tecres Ltd is part of the group ASSORESTAURO trade association that brings together the largest companies in the field of restoration, production of construction equipment, professionals in the field of technological research.

The same is the promoter and organizer of events in the field of dissemination of the restoration both Italy and abroad with exhibitions and demonstrations.

In partnership we can boast the presence of the Surveyor. Massaroni Pio Claudio, who works with us always as our general manager technician, who holds the position of delegate for the Lazio Region.

.....

In a synthetic way we wanted to present our skills and seriousness in operate, even before to count our technical, logistic and the opportunity to speak with media and advanced equipment in the industry.

Thank you for your time and for your attention to our company, we are confident that the listing of our business curriculum will find items that will better meet their needs.

Sincerely

CEO
Aurora Petruzzelli
